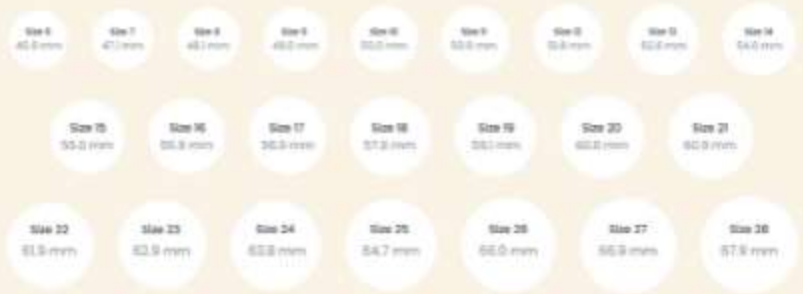
Option 1 : Measure By Matching Your Existing Ring

To find your Angara ring size, use an existing ring that fits you well. Match the inside of that ring with one of the circles below. When your ring has been placed on the right size, you should see only the white circle inside your ring. If your ideal fit falls between two sizes, we recommend choosing the larger size.



Option 2: Measure with a String

1. Take a piece of a string/tape and wrap it around your intended finger.
2. Hold the string in place and mark the meeting point for both ends.
3. Measure the marked length i.e inside circumference with a ruler and refer the chart below to find your ring size.
